Project #21

Paint Talcott Fire Department Building

Talcott Fire Department received authorization from the West Virginia State Fire Commission to go forward with plans to replace the Greenbrier Valley Rural Fire Department.

In keeping with our mission of “Paying it back” to Summers County, Classes of Hinton High School Making A Difference (MAD) approached the Talcott Fire Department and volunteered to clean and repaint their building.

Once again, MAD’s volunteers stepped up to the task. They prepped the walls, made minor cement repairs, masked and painted the walls, windows and door frames. Fifty-one gallons of paint were used and end to end, the project was completed in four days.

Post Script

The MAD group was one of several groups that pitched together to update this firehouse to State code. We will post more pictures to show the completed overall Project. Many thanks to all of the volunteers who worked tirelessly to give this community the proper fire and rescue protection that they need.
